City of Dayton & County Officials,

(RE: Glen McIntosh & Kent Harshbarger)

First, I want to apologize for this lengthy letter, there is much to unpack. It's taken me 3 days of thought and preparation for this email, so please bear with me. My name is Darrell Petrey and I was involved in an incident that happened on 2/24/23 at the Montgomery County Coroner's Office (MCCO) (the Crime Lab). Montgomery County Sheriff's Office and Dayton Police Officers were present during the incident. I asked the women at the desk to call the police, because we were being kicked out of a public building for conducting official business. There were 11 officers or more from those two departments who responded to the scene at MCCO and 9 police cars that I counted. We traveled 40 miles to Dayton, Ohio for a simple records request regarding a father's deceased child, a cold case from 10 years ago. Requests regarding an autopsy that was conducted by MCCO. We fully expected to obtain records, photos, facts, and truth about an autopsy that was done under the supervision of Kent Harshbarger's MCCO. This was deemed a non-suspicious drowning by MCCO, a known regional crime lab, so we expected no resistance to obtain records of a father's deceased child from 10 years ago. We simply wanted records from a cold case, what should have been just another dusty file. We did not want to cause a scene.

Here are some of the details that have transpired.

1. On March 17, 2013 a girl by the name of Casey Pitzer died suspiciously in Wilmington, Ohio. Her body was transported from Clinton County to the Montgomery County Coroner’s Office for an autopsy. Her death was called in to MCCO by the Wilmington Police as a suspicious death as mentioned in the Police Report. Her death was ruled an “accidental drowning” by MCCO and the "cause of death" was concluded on May 22, 2013. The Family and 3300 other people disagree with MCCO's determination. Petition · Re-Open the Casey Pitzer Suspicious Drowning Case · Change.org In Casey Pitzer's suspicious case, the key and critical evidence that could have solved Casey’s murder with certainty has come up missing at the hand of the Montgomery County Crime Lab. The last known whereabouts of the clothes that Casey was wearing, and the grass Casey was found dead holding was seen at MCCO on a stainless-steel table in the 4 photos provided to Greg back in 2013. The clothes Casey Pitzer was wearing and the grass Casey was holding came up missing.

2. In November of 2013, Casey's father Greg Pitzer requested some of the photos from his deceased daughter's autopsy that were taken by MCCO. Greg Pitzer paid $10 for his records and his request was simply and successfully fulfilled by MCCO. Greg received his records through the mail in an envelope containing just 4 photos of his daughter at MCCO. All the photos were of her clothed and her face was blacked out. At the time, that's all the photos Greg thought he'd ever need, so he did not question it. But as the years passed and additional details were collected, the suspicions grew. The Pitzer family collected additional evidence and they followed up on things being said. The questions started to pile up, so they built a book of notes and the questions. They have dug around looking for clues and facts for their unanswered questions for the past decade. They never stopped looking for answers. The Pitzer family's investigation uncovered enough to make it obvious to the naked eye. They have fought for each piece of this evil puzzle and now we have put it all together.

3. Fast forward to 2021, I first saw the evidence file and I immediately began seeing so many discrepancies. Seeing the recovery photos of a "said" drowning victim holding onto a beaded bracelet with just three fingers appeared impossible to me. Then to add she had what appeared to be a clump of grass in her other hand. I thought, how does someone hold something in both hands if they drown? To me, it was the reaction of someone being strangled, not of someone who drowned. If Casey Pitzer drowned, those beads would not have been hanging loosely on three fingers. That was the most convincing thing to me. Once I was convinced, I helped raise the red flag with the Pitzer family. I became an advocate for a woman, a daughter, sister, and mother of two who I believed was murdered. I became a friend to the Pitzer family and helped them with their investigation and quest for truth. I am Greg Pitzer's legal POA agent to aid him since he is disabled and missing his writing hand. I help him type and send emails just like this one, on his behalf and for his best interest. During our investigation, we sought information regarding the collection of the biological evidence in Casey's case. We found that No DNA profile could be located. I asked Greg about this, and he said Clinton County hung up on him and would not give him an answer, so we pried.

4. The Wilmington Police investigated in December of 2022 and found that the clothes were discarded before the funeral took place because the clothing "smelled bad". See this link: https://drive.google.com/file/d/1kXNf1Tsv64ZGbdlRgpecTrU5up35uCU_/view?usp=share_link . The problem is with that, the Personal Effects form from MCCO does not include or itemize any of the key and critical evidence we are seeking, the clothing. See this link https://drive.google.com/file/d/1HKFUGeIlcPQ1Df3-nPnBJjfyh2F6D1ED/view?usp=share_link . According to the Ohio Biological Evidence preservation laws found in the ORC section 2933.82, if the clothing (the Biological Evidence) is destroyed before the murder investigation is solved (concluded) then it would be a felony of the 3rd degree. In Casey's case, we can now prove without a doubt that a felony crime of "Tampering with Evidence" has been committed by at least one investigator from MCCO or Clinton County. So, we are trying to find that out, and I think we found them. Because the evidence was destroyed on or around March 25th, 2013, according to Wilmington's recent report. Casey's murder investigation was "pending" until May 22, 2013. That can be seen in the dated two death certificates, one pending investigation and the other claiming "accident" can be found in this file link. https://drive.google.com/drive/folders/1-zrjjNZUuNPpl4cc4U-P9qFwqvw0TLez?usp=share_link. Together they prove that a felony of the 3rd degree was committed if the funeral home did in fact discard the clothes as the recent Wilmington Police investigation report concluded. If MCCO released the clothes to be destroyed/discarded to the funeral home that should have been preserved, then someone at MCCO committed a felony of the 3rd degree. So, we dug deeper.

5. We have been in contact with the Clinton County Coroner's office multiple times regarding several deaths. We have been told by Clinton County to go to the Montgomery County Coroner's Office to obtain the photos of the autopsy. That is why we drove 40 miles and showed up to MCCO. To obtain what we thought was going to be a very simple and easy records request. We never thought 11 police officers were going to be showing up to violate our rights and escort us off the premises. We were simply there for records that have already previously been obtained by Greg. We had all the proper paperwork to show that including the receipts showing Greg's previous purchase. We also had the POA form from Casey's son, Ashten, which granted both Greg and I the legal authority as Next of Kin. We were misinformed and told by Investigator Glen McIntosh that the records "were not ours (MCCO's) to give". Our question is, then how come Greg Pitzer was holding a receipt from MCCO showing a previous purchase of records was already made? We were also misinformed that they can't release the records because they were "contracted" by Clinton County Coroner's Office. Please see attached photo.

6. On January 12, 2023, I made a phone call to the Montgomery County Coroner's Office on behalf of Greg Pitzer to inquire about MCCO's protocol on suspicious deaths and evidence preservation. Glen told me there was no protocol. Glen told me there was no evidence preservation laws that require the preservation of clothes with a suspicious death. He stated there is no required amount of time that the evidence had to be preserved. The veteran officer and investigator say I am wrong. Even though under ORC Section 3299.83 it states the evidence does. Glen was nothing short of rude, he was unhelpful in our quest to find out what happened to Casey's clothes. He was accusatory and stated he couldn't release any information. I told him I was Greg's legal Power of Attorney agent, and he could talk to me as if I were Greg. He told me that MCCO was contracted by Clinton County and that the records were not theirs to give. According to Brooke Ehlers in an email to our friend Tony there is no contract.

7. On February 24, 2023, we traveled to Dayton for the records. When we got there, the woman behind the counter told us "We can't release the records because we are contracted by Clinton County." We showed her the email from Brooke, and she called Glen. After 5 minutes of quiet and calm with the women behind the counter, Glen came out being rude and unhelpful. He expressed extremely defensive behavior and even screamed in the face of a disabled veteran, telling him to "back up" as Tony tried showing Glen an email proving him wrong.

The following events went in the following order:

1. The Clinton County Coroner's Office told us multiple times that we had to contact Montgomery County to obtain the photos:

a. https://drive.google.com/file/d/17NZESUQyGaTxrLuo7MZq8CAtmYAaxffW/view?usp=sharing

b. https://drive.google.com/file/d/1BrpXcGm5jZedKxDNDA-gl0wKfzzsBto4/view?usp=sharing

2. Phone call was made to Glen McIntosh to inquire about protocol. He was wrong in many ways, hear for yourself. https://drive.google.com/file/d/1W9Cf1cmKbiDlVwVyQQzLrZ_1oc4wUWL8/view?usp=sharing

3. In the audio, Glen laughed at me when I told him the FBI was asked to review the Casey Pitzer case. He also didn't know that FBI Special Agent Nathan Holbrook has everything and is tagged in this email. You see Mr. Holbrook came to my home looking for some info on corruption. To date, he's got around 1000 emails from me, exposing all who are involved in these whitewashed murders. Glen laughed at me in the phone call stating, "they probably just told you that". But look Glen WPD did contact the FBI just like I said: FBI contacted about Wilmington woman's mysterious drowning death (fox19.com)

4. I didn't start video recording until public servant Greg got in the face of our friend Tony, a disabled veteran: https://drive.google.com/file/d/1FPgj1NTbGILbwPEfGUWjmaQ3NuoFHtuB/view?usp=sharing

5. This video started about 5 minutes in when Glen came out and got aggressive because we were asking for records. He was adamant in Violating Our Constitutional Rights by trespassing us from the Public Property: # JusticeForCaseyPitzer (@justiceforcaseypitzer) | TikTok

6. See Video here of the incident Glen caused on TikTok. It is going viral for what was done to us. 85,000 views and over 1000 comments screaming red flags, in a day and a half.: #JusticeForCaseyPitzer (@justiceforcaseypitzer) | TikTok

After the mayhem, we went directly to the Montgomery County Sheriff's Office. We asked to do a police report for tampering with evidence which is a felony crime of the third degree. Dayton Police and the Sheriff's Office refused to take a report even though my accusations are "murder cover ups" which the evidence clearly proves without a doubt. So, my questions are, is Kent Harshbarger immune to investigations and prosecution in Montgomery County? How many murders has he covered up? Because, if he signs his name at the lab with a simple "K" as seen on the attached receipt from 2013. I assure you; he's been caught aiding in the cover up murder of Casey Pitzer, 100%! Is he still going to be in charge of death determinations after this proof? See the attached receipt.

After 10 years, we now have the Walmart video from 2013 that shows the suspects did not pull onto SR73 like they said they did the night Casey died. We have interviewed one of the murder suspects and the eyewitness who claimed she almost hit her. Both of their 2023 versions are not the same as their original statements, they are lying. We have women bravely coming forward against the suspect Brandon Reed with rape and sexual assault accusations. We have enough to convict all involved in aiding in the cover up murder of Casey Pitzer and Marvin Andy Napier, including Montgomery County Coroner Dr. Kent Harshbarger. Our direct accusation against Dr. Kent Harshbarger involves the serial whitewashing of murders over a lengthy span. We know the autopsy photos will show Casey was sexually assaulted (why else destroy the clothing and sell the car?) Her leg is broken, see recovery photos in Justice file. There will be strangulation ligature marks around her neck that will be definitive (due to the rope and milkcrate found in the pond). And more than likely busted blood vessels and petechiae (red freckles) in one or both of her eyes. That's why we want those photos and the reason above is why 11 police officers showed up to stop us.

We would also like to put in a public records request for the following from Dayton Police Department and the Montgomery County Sheriff's Office.

1. Police cam footage and audio from every officer on scene from time of dispatch to time logged off the scene. We ask for the video and audio to remain unredacted. Especially in the conversations between the officers who spoke with MCCO staff (Dr., Glen, others).
2. Names and badges numbers from every officer on scene.
3. A Copy of the trespass from MCCO, and what law were we breaking to be trespassed.
4. The police incident investigation report regarding the incident at MCCO.
5. The names and titles of MCCO staff members who were on-scene.

I would also like a response from The Dayton Chief of Police and the Montgomery County Sheriff as to why we were not allowed to file a police report for the accusations of multiple murder cover ups by MCCO. There were three witnesses to the events and reports were refused by both MCSO and Dayton PD, why? We would also like to know if Kent Harshbarger signed with a letter "K" on the MCCO receipt from 2013. I also request that both the MCSO Sheriff and Dayton Chief of Police contact the FBI, US AG's Ohio, Ohio AG Dave Yost, The Inspector General's Office, and BCI for a

full investigation. SA Holbrook is attached in this email so please contact him for an investigation of this exposed public corruption.. Please contact the Ohio Coroner's and Medical Board, and every other official you can think of that will aid in the massive investigation of serial whitewashed murders by MCCO. Clinton County Sheriff Ralph D. Fizer, do you have anything you'd like to add? Chief Ron Fithen? Mayor John Stanforth? Clinton County/City of Wilmington Officials who are CC'd in this email, does anyone from Clinton County have anything to say?

We'd also like to request from MCCO the records for Casey Pitzer's Autopsy as next of Kin to Casey Pitzer. Legal POA of Casey's son Ashten. I speak this request on his behalf and can show appropriate paperwork to obtain the records. We request the complete Coroner file including all photos of the autopsy performed on Casey Pitzer for MCCO Case #CC 13-1242. We would also like to request the evidence chain of custody logs for the clothes Casey was wearing when found dead. Also, for the "grass" Casey was found holding. We'd also like any records that pertain to any forensic work, DNA Profile, Rape Kit, or X-Rays. And last the MCCO Investigator Report (My guess, Glen's report).

What if you suspected your child was murdered, and you couldn't get the autopsy photos that belong to you? What if you couldn't get them even after 10 years, would you just give up on your child? A grieving father who has spent 10 years looking for answers came to Dayton, Ohio to find answers and facts about his deceased daughter Casey Pitzer. We found all the above. The reaction of MCCO and the police departments told us and 85,000 viewers overnight on TikTok that things are not right in Dayton, Ohio. So, now everyone wants to know how we are going to fix this. The video will be worldwide soon and so many people are going to be very upset if these records are withheld by MCCO any longer. The first thing we'd like is every single record I have requested. I am asking with no delays after what we experienced at MCCO. Please make it quick and easy for Greg, it'll be 10 years since Casey was murdered.

What if it were your child? I hope each and every one of you Montgomery County and Dayton Officials decide to write back (except Kent & Glen).

In closing I wanted to touch on the most important part of it all. I tell it like I see it. I tell the truth. God sent me here as a Lamb among Wolves Luke 10:3. I was the crazy fundraising guy telling everyone for 10 years the God was telling me to build. See my vision as Acts 2:17 states in this link:

UNIVERSAL PITCH PDF.pdf - Google Drive

I tell it like I see it. Covid shut our fundraiser down in early 2020. In the link above, you can see from my timeline that I was expecting to excel in the school fundraising world, instead he led me here, to all of you. I have predicted things people don't predict. All this stuff I thought sounded crazy is all coming true. I have so many witnesses that proves there is a God, because he tells me what to do. I wrote about all this stuff happening before it ever happened back during Christmas of 2013. The same year Casey Pitzer was murdered. I am 5 days older than her. She was born on June 15th; I was on the 10th. She was a mother of two, Tyler and Ashten. Her boys grew up without a mom. She was a sister and a best friend to many. People loved her. No one had a bad word to say about her except those who covered up her murder. God is here with me, and Casey Pitzer is too. A movement is taking place, it has been in Clinton County: (3) Citizen's Arrest of Clinton County, Ohio | Facebook. Right is right and wrong is wrong, no matter who you are.

I hope to hear very back soon,
Darrell
